

THE HYBRID WORK MODEL IS HERE TO STAY: IS YOUR WORKSPACE READY?

A Align yourself with an IT ally

The hybrid work model relies on having functional technology and strategies.

Datasmith can meet with you to assess your current environment and create a roadmap of recommendations.

B Beware of the rise in digital threats

It's a hackers dream: employees on the go, devices that move in and out of company networks, and security staffs stretched thin.

The best way to avoid an attack is to enhance your security with Datasmith SOCaaS to provide 24/7/365 threat detection and response.

C Cybersecurity for home networks

Do you have a layered approach to secure your network, Wi-Fi, and connected devices?

Installing a Virtual Private Network (VPN) is a must-have security layer as well as Multi-Factor Authentication and other easy to install solutions.

D Do I need to enhance my security?

The answer is YES. Security threats are everywhere and they are targeting your business - no matter how big or small.

Datasmith can help you better leverage your technology. Cybersecurity Awareness Trainings are also available to help educate your staff.
